Second Life Gold Solution Providers

Who We Are - CNDG

Chant Newall Development Group, LLC (CNDG) is a Gold Solution Provider for Second Life working directly with Linden Lab to create complete applications on the Second Life platform. In addition, we build Virtual Reality (VR) environments and applications on any OpenSIM based platform, either on our own servers or on yours. CNDG is part of a family of interlocking companies providing comprehensive solutions and content for education and business needs in real and virtual spaces. CNDG offers a full range of design, building, applications creation, and consulting services and is a full-service developer for Virtual Reality environments of all kinds.

Who We Are – FWI

The FutureWork Institute, Inc. (FWI) is a 20-year old multi-million dollar, global consulting firm that translates future trends to transform organizations and institutions. Operating on four continents, the Institute's products and services help managers and employees to make a MindShift, a HeartShift and a SkillShift.. FWI's work in Second Life is focused on training, learning and collaboration through 3D immersive experiences, and in managing large, multi-national projects.

Who We Are—CNDG/FWI

CNDG teams and builders have been creating and building totally immersive experiences to exacting specification since 2006 for both multi-national corporate clients and educational institutions. CNDG creates for clients a wide variety of VR environments including realistic, photo-accurate reproductions of detailed, real-life settings. These environments provide instructional and meeting spaces, live and scripted self-directed education and training, facilitated and instructor-based education, and interactive role play for team building and complex simulations. CNDG uses its own branded and scripted hybrid set of tools, based upon a complex of LSL, C# and web-based programmed interactions, for data and event streaming into and out of SL /VR in real time.

Working together, CNDG/FWI provides you and your project with professional project managers, VR designers, educators, content experts, and technical personnel for both local and major global projects. We bring over 20 years of consulting experience, more than 100 consultants working around the globe on four continents, in-depth experience in computer graphic design and environment building, full server implementation and maintenance, and scripting of interactive elements both within the VR environment, scripted with Linden Scripting Language (LSL) and in C#, and in web-based applications using the latest in HTML coding.

In addition, CNDG has full Machinima video production capabilities , web-broadcast abilities and can deliver VR experiences and environments on a variety of distributable platforms and interface devices to viewers and clients in almost any setting. CNDG provides IT and programming support for all projects both on the SL platform and on servers communicating with applications utilizing VR platforms.

Together, CNDG and FWI can create virtually any totally immersive interactive VR presence in Second Life or on dedicated OpenSIM servers, meeting your specific educational needs and organizational purposes. CNDG/FWI is located in New York City and has offices and representatives around the world.
